# CARE CENTRAL

Web-enabled software and cloud services allow clinicians to examine, diagnose, and treat even the most at-risk patients anytime, anywhere.

- Expedite clinical decisions and expand clinical reach using Virtual Exam Room (VER)
- Clinical accuracy of an in-hospital exam across all patient populations, neonate to adult
- Effectively manage and monitor remote patients from any care setting with biometric trends and patient alert system
- Seamless EMR integration (HL7)

## VIRTUAL EXAM ROOM

From the Care Central Waiting Room, clinicians and patients connect using VER for real-time patient diagnosis and treatment

- Simultaneous video conferencing and viewing of diagnostic data and medical images
- Clinicians view vital signs, cardiopulmonary, biometric data, and medical images of remote patients
- HIPAA-compliant VER maintains patient privacy

## VER-GoCLINIC

Portable, self-contained, rolling patient examination and diagnostic clinic that brings complete healthcare services to the field. Traveling clinicians can make clinical diagnoses or connect to a specialist for immediate clinical assessment in any remote healthcare setting, including adhoc clinics, schools, occupational health facilities, correctional facilities, and offshore industries platforms

## VER-CLINIC

Versatile, compact, and fully integrated telehealth system for in-clinic use. VER connects clinicians or specialists with patients in rural and remote clinics, urgent care, skilled nursing, assisted living, and rehab facilities.

## VER-MEDIC

Mobile, ruggedized telehealth case designed to overcome the challenges of complex, unpredictable emergency field conditions. VER enables access to physicians for immediate clinical assessment. Ideal for Emergency Medical Services (EMS), disaster relief, community based health care, and correctional facilities.
